PREFACE

Crime in Illinois 1984 is the thirteenth annual compilation of state crime statistics published by the Department of Law Enforcement since it became the central repository and custodian of such figures.

This year, as last, statistics from the City of Chicago are recorded in a separate section. While the problems that led to the omission of the city's figures in 1982 have largely been corrected, it has been necessary to separate Chicago's figures from the rest of the state's to avoid creating a misleading impression of the number of crimes and the rate of crimes in the state.

This edition will be the last to use the category of rape. Since July 1, 1984, sex crimes committed in Illinois have been governed by a new statute entitled the "Illinois Criminal Sexual Assault Act" (P.A. 83-1067), which, among other changes, created new offense codes. The new categories were implemented January 1, 1985 and will be reflected in the next publication of *Crime in Illinois*.

Crime in Illinois 1984 is one of the products of the Uniform Crime Reporting Program, which entails monthly submission of data by law enforcement agencies throughout the state. When correlated and analyzed, the statistics constitute a useful body of knowledge that significantly contributes to management and planning activities at local, state, and federal levels.

Since its inception, the quality and scope of the Uniform Crime Reporting Program have increased, thanks to the dedication and cooperation of each participating agency. I am confident the trend will continue.

With gratitude to all who have contributed to its publication, I present *Crime in Illinois 1984* to the people of Illinois.

INTRODUCTION

INTRODUCTION

THE ILLINOIS UNIFORM CRIME REPORTING PROGRAM

The Illinois Uniform Crime Reporting (I-UCR) Program was developed in 1971 and implemented on January 1, 1972. The I-UCR Program has evolved into a system intended to meet the needs of all reporting agencies. It is an incident-based reporting system designed to accomplish the following major goals:

- To provide needed administrative statistics for law enforcement agencies.
- To provide the legislature with information necessary to formulate effective laws which address the crime problem.
- To provide Illinois citizens with the most complete information on the nature and extent of crime.
- To include comprehensive data for researchers and planners.
- To adhere to the national program's standards.

Reporting crime statistics is mandated by chapter 38, section 206-8 of the *Illinois Revised Statutes:*

> 206-8. Crime Statistics.8. The Department (of Law Enforcement) shall be a central repository and custodian of crime statistics for the state and it shall have all power incident thereto to carry out the purposes of this Act, including the power to demand and receive cooperation in the submission of crime statistics from all units of government.

Reporting agencies receive monthly and quarterly summaries of the reported criminal activity within their jurisdictions upon request. All offenses known to law enforcement agencies are reported monthly to the Crime Studies Section of the Bureau of Identification. Participating jurisdictions include villages, municipalities, counties, colleges, universities, park districts, railroads, and hospitals throughout Illinois. Agencies may also submit service code and local ordinance data in order to provide law enforcement administrators with information for use in planning and research, determining and utilizing manpower, budgeting, and developing and evaluating crime prevention programs.

In 1984, there were 998 law enforcement agencies in Illinois, 734 of which reported crime statistics directly to the Bureau of Identification. The remaining agencies reported their crime statistics through an intermediary agency (sheriff's office, police department, etc.). Agencies submit their data through the use of source documents, printouts, magnetic tape, or via remote on-line terminals.

CONSIDERATIONS FOR INTERPRETATION

When comparing the crime statistics of one agency with another, many factors should be taken into consideration before conclusions are made. Some of the conditions affecting the type and volume of crime are:

- Density and size of the community population and the metropolitan area of which it is a part.
- Composition of the population with reference particularly to age, sex, and race.
- Economic status and mores of the population.
- Stability of population, including commuters, seasonal workers, and other transient types.
- Climate, including seasonal weather conditions.
- Educational, recreational, and religious characteristics.
- Effective strength of the police force.
- Standards of appointments to the local police force.
- Policies of local officials.
- Attitudes and policies of the courts and corrections.
- Attitudes of the public toward law enforcement problems.
- Administrative and investigative efficiency of law enforcement, including the degree of adherence of crime reporting and standards.
- Organization and cooperation of adjoining and overlapping police jurisdictions.[1]

THE REPORTING OF RAPE AND ILLINOIS CRIMINAL SEXUAL ASSAULT ACT OFFENSES

Effective July 1, 1984, sex crimes committed in Illinois were governed by a new statute entitled "Illinois Criminal Sexual Assault Act" (P.A. 83-1067). This statute repealed eight existing laws in Illinois including rape.

The rape statistics presented in *Crime in Illinois 1984* reflect offenses and arrests reported as rape during January-June 1984 and offenses and arrests reported as aggravated criminal sexual assault and criminal sexual assault during July-December 1984.

Law enforcement agencies began July 1, 1984, reporting the new sex offenses to the I-UCR Program using the following conversion table. New offense codes and classifications were implemented January 1, 1985, and will be reflected in the next publication of *Crime in Illinois*.

Aggravated criminal sexual assault offenses committed with any other dangerous weapon or with any of the following aggravating circumstances present are reported under I-UCR Offense Code 0213. Likewise, attempted aggravated criminal sexual assault offenses with any other dangerous weapon or with any of the following aggravating circumstances present are reported under I-UCR Offense Code 022D.

THE CRIME INDEX

The Crime Index is the total number of index offenses occurring within a given jurisdiction during a specified period of time. It is used to indicate the amount and extent of serious crimes as defined by the International Association of Chiefs of Police Committee on Uniform Crime Reports. The Crime Index consists of violent crimes — murder and voluntary manslaughter; forcible rape; robbery; and aggravated assault, aggravated battery, and attempted murder, and of property crimes — burglary, theft, motor vehicle theft, and arson.

The index crimes used by the I-UCR Program translate into the national program's eight Crime Index offenses as:

Violent Crimes

Murder and voluntary manslaughter — The willful killing of a person or the death of a person caused by gross negligence of an individual other than the victim.

Forcible rape — The carnal knowledge of a female, forcibly and against her will; includes attempted rape.

Robbery — The taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence; includes attempted robbery.

Aggravated assault — The intentional causing of serious bodily harm or the intentional attempt or threat of serious bodily injury or death; includes aggravated battery and attempted murder.

Property Crimes

Burglary — The unlawful entry of a structure to commit a felony or theft; includes attempted burglary.

Theft — The unlawful taking or stealing of property or articles without the use of force, violence, or fraud; includes burglary from motor vehicle and attempts.

Motor vehicle theft — The unlawful taking or stealing of a motor vehicle; includes attempted motor vehicle theft.

Arson — The willful or malicious burning or attempts to burn, with or without intent to defraud, a dwelling house, public building or any building, motor vehicle, aircraft, or personal property of another.

THE CRIME RATE

The crime rate indicates the volume of crime occurring within a given population. It is defined as the total number of index crimes per 100,000 inhabitants and is calculated as follows:

$$\frac{\text{Crime Index} \times 100{,}000}{\text{jurisdictional population}} = \text{crime rate}$$

The jurisdictional population can be that of a city, town, village, state, or nation.

Because of agency adjustments and late submissions, 1983 figures reflected in this publication are not comparable with those figures published in *Crime in Illinois 1983*.

Chicago Police Department statistics are not included in the totals presented in Crime in Illinois 1984. Chicago Police Department statistics are published separately in section VI.

MURDER AND VOLUNTARY MANSLAUGHTER

The index offenses of murder and voluntary manslaughter are merged in accordance with the national program definition and are based solely on police investigation.

Murder

38 § 9-1.

(a) A person who kills an individual without lawful justification commits murder if, in performing the acts which cause the death:

(1) He either intends to kill or do great bodily harm to that individual or another, or knows that such acts will cause death to that individual or another; or

(2) He knows that such acts create a strong probability of death or great bodily harm to that individual or another; or

(3) He is attempting or committing a forcible felony other than voluntary manslaughter.

Voluntary manslaughter

38 § 9-2.

(a) A person who kills an individual without lawful justification commits voluntary manslaughter if at the time of the killing he is acting under a sudden and intense passion resulting from serious provocation by:

(1) The individual killed; or

(2) Another whom the offender endeavors to kill, but he negligently or accidentally causes the death of the individual killed.

Serious provocation is conduct sufficient to excite an intense passion in a reasonable person.

(b) A person who intentionally or knowingly kills an individual commits voluntary manslaughter if at the time of killing he believes the circumstances to be such that, if they existed, would justify or exonerate the killing under the principles stated in chapter 38, article 7, Illinois Revised Statutes, *but his belief is unreasonable.*

ARSON

The I-UCR Program includes arson—explosive device, arson—incendiary device, aggravated arson, and attempted arson in the data presented under the heading of arson, but does not include possession of explosive or incendiary devices.

Arson

38 § 20-1.

A person commits arson when, by means of fire or explosive, he knowingly:

(a) Damages any real property, or any personal property having a value of $150 or more, of another without his consent; or

(b) With intent to defraud an insurer, damages any property or any personal property having a value of $150 or more.

Property "of another" means a building or other property, whether real or personal, in which a person other than the offender has an interest which the offender has no authority to defeat or impair, even though the offender may also have an interest in the building or property.

Aggravated arson

38 § 20-1.1.

(a) A person commits aggravated arson when, by means of fire or explosive, he knowingly damages, partially or totally, any building or structure, including any adjacent building or structure, and:

(1) He knows or reasonably should know that one or more persons are present therein; or

(2) Any person suffers great bodily harm, or permanent disability or disfigurement as a result of the fire or explosion; or

(3) A fireman or policeman who is present at the scene acting in the line of duty, is injured as a result of the fire or explosion.

CRIME INDEX/CRIME RATE DATA

CRIME INDEX/CRIME RATE DATA

Caution should be exercised when reviewing and using these data. The many social factors related to crime and a community's residential population — used to calculate the crime rate — must be considered when making statistical comparisons. A community may have a small residential population but a large moving population because of a substantial number of manufacturers, motels, etc., within its jurisdiction. The large moving population attracts criminal behavior that occurs within the small jurisdiction and must be reported by the law enforcement agency. The crime rate calculation does not compensate for a moving population. The statistics can make it appear that crimes are committed by community residents when this is not necessarily true.

U.S. DEPARTMENT OF COMMERCE BUREAU OF CENSUS

STANDARD METROPOLITAN STATISTICAL AREAS

A Standard Metropolitan Statistical Area (SMSA) includes a city of more than 50,000 and the county in which the city is located, plus other cities which exhibit strong ties with the city. The county sheriff's office is also included for crime reporting purposes.* Two of the SMSAs overlap with Iowa and Missouri. Areas outside of Illinois that are included in an SMSA are deleted from the statistics presented here.

SMSA Summary

The estimated population of core cities and suburban areas — the two regions that comprise the SMSAs — accounts for 74.2 percent of the state population. The total SMSA index crimes account for 84.3 percent of the Illinois Crime Index.

SMSA Core Summary

A core city is within an SMSA and has a population of 50,000 or more inhabitants. The "twin central cities" of certain SMSAs have combined populations of 50,000 or more inhabitants and are considered together as a core city.*

The inhabitants of core cities represent 19.3 percent of the state's population and 26.0 percent of the SMSAs' population. Core cities account for 31.2 percent of the Illinois index crimes and 37.0 percent of the total SMSA index crimes.

SMSA Suburban Summary

A suburban area consists of cities and towns with 50,000 or less population, including the counties which are within the SMSA. The county sheriff's office is included in the suburban area.*

Suburban areas lie outside core cities and are bounded by the SMSA lines. The inhabitants of suburban areas represent 55.0 percent of the state's population and 74.1 percent of the SMSAs' population. Suburban areas account for 53.1 percent of the Illinois index crimes and 63.0 percent of the total SMSA index crimes.

SECTION VI

INTRODUCTION

Chicago Police Department's crime data for 1984 are presented separately for the third consecutive year due to reporting problems which surfaced in late 1982. Chicago Police Department auditors conducted an internal audit in early 1983 which concluded that 40.7 percent of the 2,386 cases studied were incorrectly classified as unfounded during 1982. Serious concern arose from these findings relative to the reliability of Chicago Police Department's data and the impact on statewide crime trends. Chicago Police Department's data are presented separately in order to minimize the distortion of statewide crime trends.

It is noteworthy that the Chicago Police Department completely revised and implemented new reporting procedures during 1983 which significantly enhanced the integrity and reliability of Chicago's crime data. The revised reporting practices resulted in dramatic increases in all crime index categories for 1983 and 1984. However, caution is advised in any analysis of these data as much of the increase may be attributed to a more creditable crime reporting system.

LAW ENFORCEMENT OFFICERS KILLED

During 1984, three Illinois law enforcement officers were killed by felonious acts and two by accident. A brief narrative on the circumstances surrounding each felonious death is presented below.

January

Chicago — On January 25, 1984, police officers with the Chicago Police Department and the 3rd District Tactical Unit made a narcotics buy during an undercover operation. Upon completion of the operation, the offender was placed under arrest by one of the police officers. A struggle ensued whereby the female officer was accidently shot and killed by a fellow officer.

Chicago — Six officers with the Chicago Police Department attempted to execute a narcotic search warrant at a residence. When admittance was denied, the officers forcibly entered the apartment. The male offender hiding behind a sofa jumped up and fired a .38-caliber handgun. One of the officers, a 41-year-old patrolman, sustained three gunshot wounds, one below the waist and two to the head. The other officers returned fire, killing the 22-year-old subject.

September

Joliet — Two officers with the Joliet Police Department stopped a suspicious vehicle at approximately 5:00 p.m. on September 12, 1984. Before the officers confronted the four occupants, two jumped out of the vehicle and ran. One officer exited the patrol unit and gave chase on foot and directed the other officer to circle the block in the squad car in an effort to halt the fleeing suspects. The two remaining occupants fled the scene in the suspicious vehicle. Circling the block in the patrol unit, the officer observed nothing but subsequently heard gunfire and discovered the 32-year-old officer dead. The officer had been shot approximately five times with either a .38-caliber or 9 mm handgun. He suffered one wound in the center of the forehead and four others in the upper torso just above his protective vest. Three suspects were apprehended, questioned, and released. The fourth suspect, an 18-year-old male, has been charged with murder but is still at large.

LAW ENFORCEMENT EMPLOYMENT INFORMATION

The employment rate for law enforcement personnel is calculated as follows:

$$\frac{\text{number of employees} \times 1{,}000}{\text{jurisdictional population}} = \text{employment rate}$$

Example:

A department with 60 employees in a population of 51,000 has an employment rate of 1.2 per 1,000 inhabitants.

$$\frac{60 \times 1{,}000}{51{,}000} = 1.2 \text{ per } 1{,}000 \text{ inhabitants}$$

Law enforcement employment rates should not be correlated with index crimes; non-index offenses and the many services performed by the typical law enforcement officer amount to over 80 percent of the officer's workload, the details of which usually remain unpublished. Each community should consider all the factors related to the causes of crime and determine the role of the law enforcement department relative to crime and to required services.

The 25,135 part- and full-time sworn officers in 1984 account for 84.3 percent of the police department work force. The 1984 employment rate for sworn employees of police departments is 4.1 per 1,000 inhabitants. The 4,675 civilian employees comprise 15.7 percent of the police department work force, with an employment rate of .8 per 1,000 inhabitants.

The 3,267 part- and full-time sworn officers in 1984 account for 69.4 percent of the sheriffs' offices work force. The 1984 employment rate for sworn employees of sheriffs' offices is 1.4 per 1,000 inhabitants. The 1,442 civilian employees comprise 30.6 percent of the sheriffs' offices work force, with an employment rate of .6 per 1,000 inhabitants.
